

Chinta Vijaya Kumar

Fresh Graduate in Data Science & Big Data Analytics · Seeking Entry-Level Data Analyst Opportunities

+91 8187023747 | vijayakumar.chinta15@gmail.com | LinkedIn | GitHub

Professional Summary

Data Science graduate with hands-on experience in Python, SQL, and data analysis frameworks including Pandas and NumPy. Skilled in exploratory data analysis, statistical reasoning, customer segmentation, and building dashboards using Power BI, Tableau, and Amazon QuickSight. Experienced in working with structured datasets, deriving business insights, and presenting findings through visual reporting. Comfortable collaborating across teams, understanding data requirements, and contributing to data-driven decision-making processes. Eager to apply analytical skills in a practical environment and grow through real-world data challenges.

Key Skills

Languages: Python, SQL

Data & BI: Pandas, NumPy, EDA, Power BI, Tableau, Matplotlib, Seaborn, Excel

Databases: PostgreSQL

Dev Tools: Git, GitHub, VS Code, Postman

Soft Skills: Communication, Collaboration, Adaptability, Time Management, Continuous Learning

Education

Koneru Lakshmaiah Education Foundation, Guntur, AP

Jul 2022 – May 2026

Bachelor of Technology in Data Science and Big Data Analytics

CGPA: 8.8

Tirumala Junior Kalasala, Rajamahendravaram

Aug 2020 – Apr 2022

MPC

Percentage: 92%

Experience

Intern – Bean Infosystems, Hyderabad

May 2024 – Jun 2024

- Wrote and optimized database queries to improve data retrieval accuracy and support application performance reporting.
- Assisted in identifying and resolving data inconsistencies during debugging and testing activities.
- Collaborated with developers to understand data flow across application modules and contributed to documentation.
- Supported frontend data display updates and UI changes based on structured data inputs from the backend.
- Gained exposure to software development lifecycle, data handling practices, and team-based project workflows.

Projects

Customer Segmentation and Reporting Dashboard: 📊

Python, Pandas, scikit-learn, Streamlit, Plotly

- Built an end-to-end customer segmentation dashboard analysing 1M+ real transactions from the UCI Online Retail II dataset (5,000 customers).
- Engineered RFM (Recency, Frequency, Monetary) scoring and applied K-Means clustering to classify customers into 10 behavioural segments (Champions, At Risk, Lost, etc.).
- Developed an interactive Streamlit dashboard with Plotly visualisations, including RFM scatter plots, cohort retention heatmaps, and 3D cluster views.
- Built a business recommendation engine with priority scoring and a campaign planner, exporting segment-level reports as CSV.
- Containerised the application with Docker and deployed it on Streamlit Cloud for live demo access.

Haett Partner Portal: 📱

Vue.js, FastAPI, PostgreSQL, SQLAlchemy

- Developed a full-stack partner management platform with structured data workflows covering submission, review, and approval cycles.
- Designed PostgreSQL database schemas to support partner records, status tracking, and audit-ready data management.
- Built search, filtering, and reporting views to allow administrators to query and monitor partner application data efficiently.
- Integrated backend APIs with frontend dashboards to maintain real-time data accuracy across the platform.
- Implemented role-based access control ensuring secure and structured data access for different user types.

Certifications

- AWS Certified Cloud Practitioner – Amazon Web Services, Sep 2024
- Salesforce Certified AI Associate – Salesforce, Oct 2024
- Automation Anywhere Certified Essentials RPA Professional 2023
