

Chinta Vijaya Kumar

Aspiring Data Analyst | BI Analyst | Python Developer

+91 8187023747 | vijayakumar.chinta15@gmail.com | LinkedIn: Vijayakumar | GitHub: VijayaKumarChinta

Professional Summary

Aspiring data analyst and Business Intelligence enthusiast with hands-on experience in Python, SQL, Tableau, Power BI, and machine learning projects. Built a strong foundation in data analysis and visualization. Passionate about leveraging data to drive business decisions and continuously expanding expertise in analytics, cloud technologies, artificial intelligence, and emerging data-driven solutions. Eager to learn, adapt, and contribute to innovative teams in a dynamic professional environment.

Technical Skills

Programming: Python, SQL

Data Analysis & BI: Power BI, Tableau, Excel, Jupyter Notebook, Amazon QuickSight

Machine Learning: Scikit-learn, Deep Learning, Attention U-Net, PyTorch/TensorFlow

Databases: PostgreSQL

Web & Backend: Django, HTML, CSS, JavaScript

Tools & Platforms: GitHub

Soft Skills: Analytical Thinking, Communication, Problem Solving, Team Collaboration, Adaptability

Education

Koneru Lakshmaiah University, Guntur, AP

Jul 2022 – May 2026

Bachelor of Technology in Data Science and Big Data Analytics

CGPA: 8.8

Tirumala Junior Kalasala, Rajamahendravaram

Aug 2020 – Apr 2022

MPC

Percentage: 92%

Experience

Intern – Bean Infosystems, Hyderabad

May 2024 – June 2024

- Assisted in developing and maintaining full-stack web applications using Java, HTML, CSS, and JavaScript.
- Optimized database queries to improve application performance and efficiency.
- Collaborated with developers to implement scalable and user-friendly solutions.
- Gained practical exposure to software development lifecycle and team-based project execution.

Projects

Customer Segmentation for Targeted Marketing

Python, SQL, Scikit-learn, Amazon QuickSight

- Built a K-Means clustering model to identify customer segments based on purchasing behavior and demographics.
- Performed data preprocessing, feature scaling, and missing value handling using Python and SQL.
- Applied the Elbow Method to determine optimal cluster count, improving segmentation quality.
- Designed interactive QuickSight dashboards to visualize customer insights and support targeted marketing decisions.
- Trained model on 10,000+ customer records; uncovered actionable behavioral patterns for data-driven strategies.

Liver Segmentation using Attention U-Net

Deep Learning, PyTorch/TensorFlow

- Developed an Attention U-Net deep learning model for automated medical CT image segmentation.
- Enhanced segmentation accuracy through attention mechanisms and systematic hyperparameter tuning.
- Preprocessed and augmented medical imaging datasets to improve model robustness and generalization.
- Achieved ~91% segmentation accuracy, evaluated using Dice Coefficient and standard segmentation metrics.
- Demonstrated practical application of AI in healthcare imaging analysis and clinical decision support.

Haett Partner Portal

Vue.js, FastAPI, PostgreSQL, SQLAlchemy

- Developed a full-stack partner management portal using Vue.js, FastAPI, PostgreSQL, and SQLAlchemy.
- Implemented JWT authentication and role-based access control for users and administrators.
- Built partner application workflows for submission, review, approval, rejection, and reapplication.
- Developed an admin dashboard with search, filtering, and application management features.
- Automated discount code generation and activation controls for approved partners.

Certifications

- AWS Certified Cloud Practitioner (AWS) – Sep 2024
- Salesforce Certified AI Associate – Oct 2024
- Automation Anywhere Certified Essentials RPA Professional 2023
